<b>PREFACE</b>	<b>xi</b>
<b>1 Classification</b>	<b>1</b>
1.1. Duct Jet Propulsion / 2	
1.2. Rocket Propulsion / 4	
1.3. Applications of Rocket Propulsion / 15	
References / 25	
<b>2 Definitions and Fundamentals</b>	<b>27</b>
2.1. Definition / 27	
2.2. Thrust / 32	
2.3. Exhaust Velocity / 34	
2.4. Energy and Efficiencies / 36	
2.5. Typical Performance Values / 39	
Problems / 41	
Symbols / 43	
References / 44	
<b>3 Nozzle Theory and Thermodynamic Relations</b>	<b>45</b>
3.1. Ideal Rocket / 46	
3.2. Summary of Thermodynamic Relations / 47	
3.3. Isentropic Flow through Nozzles / 52	

- 3.4. Nozzle Configurations / 75
- 3.5. Real Nozzles / 85
- 3.6. Four Performance Parameters / 92
- 3.7. Nozzle Alignment / 94
- 3.8. Variable Thrust / 96
  - Problems / 97
  - Symbols / 99
  - References / 100

## **4 Flight Performance 102**

- 4.1. Gravity-Free Drag-Free Space Flight / 102
- 4.2. Forces Acting on a Vehicle in the Atmosphere / 106
- 4.3. Basic Relations of Motion / 108
- 4.4. Effect of Propulsion System on Vehicle Performance / 115
- 4.5. Space Flight / 117
- 4.6. Flight Maneuvers / 132
- 4.7. Flight Vehicles / 139
- 4.8. Military Missiles / 149
- 4.9. Aerodynamic Effect of Exhaust Plumes / 152
- 4.10. Flight Stability / 153
  - Problems / 154
  - Symbols / 157
  - References / 159

## **5 Chemical Rocket Propellant Performance Analysis 160**

- 5.1. Background and Fundamentals / 161
- 5.2. Analysis of Chamber or Motor Case Conditions / 169
- 5.3. Analysis of Nozzle Expansion Processes / 172
- 5.4. Computer Analysis / 179
- 5.5. Results of Thermochemical Calculations / 180
  - Problems / 189
  - Symbols / 193
  - References / 195

## **6 Liquid Propellant Rocket Engine Fundamentals 197**

- 6.1. Propellants / 201
- 6.2. Propellant Feed Systems / 203
- 6.3. Gas Pressure Feed Systems / 205

- 6.4. Propellant Tanks / 211
- 6.5. Tank Pressurization / 218
- 6.6. Turbopump Feed Systems and Engine Cycles / 221
- 6.7. Flow and Pressure Balance / 227
- 6.8. Rocket Engines for Maneuvering, Orbit Adjustments, or Attitude Control / 228
- 6.9. Valves and Pipe Lines / 232
- 6.10. Engine Support Structure / 235
  - Problems / 236
  - Symbols / 238
  - References / 239

## **7 Liquid Propellants** **241**

- 7.1. Propellant Properties / 242
- 7.2. Liquid Oxidizers / 251
- 7.3. Liquid Fuels / 255
- 7.4. Liquid Monopropellants / 259
- 7.5. Gelled Propellants / 261
- 7.6. Gaseous Propellants / 263
- 7.7. Safety and Environmental Concerns / 264
  - Problems / 265
  - Symbols / 266
  - References / 266

## **8 Thrust Chambers** **268**

- 8.1. Injectors / 271
- 8.2. Combustion Chamber and Nozzle / 282
- 8.3. Heat Transfer Analysis / 308
- 8.4. Starting and Ignition / 320
- 8.5. Variable Thrust / 323
- 8.6. Sample Thrust Chamber Design Analysis / 324
  - Problems / 335
  - Symbols / 338
  - References / 340

## **9 Combustion of Liquid Propellants** **342**

- 9.1. Combustion Process / 343
- 9.2. Analysis and Simulation / 346
- 9.3. Combustion Instability / 348

Problems / 360  
References / 360

**10 Turbopumps, Engine Design, Engine Controls, Calibration, Integration, and Optimization 362**

- 10.1. Turbopumps / 362
- 10.2. Performance of Complete or Multiple Rocket Propulsion Systems / 384
- 10.3. Propellant Budget / 387
- 10.4. Engine Design / 389
- 10.5. Engine Controls / 396
- 10.6. Engine System Calibration / 405
- 10.7. System Integration and Engine Optimization / 411
  - Problems / 413
  - Symbols / 413
  - References / 415

**11 Solid Propellant Rocket Fundamentals 417**

- 11.1. Propellant Burning Rate / 419
- 11.2. Basic Performance Relations / 437
- 11.3. Propellant Grain and Grain Configuration / 444
- 11.4. Propellant Grain Stress and Strain / 453
- 11.5. Attitude Control and Side Maneuvers with Solid Propellant Rocket Motors / 466
  - Problems / 467
  - Symbols / 470
  - References / 471

**12 Solid Propellants 474**

- 12.1. Classification / 474
- 12.2. Propellant Characteristics / 480
- 12.3. Hazards / 487
- 12.4. Propellant Ingredients / 494
- 12.5. Other Propellant Categories / 505
- 12.6. Liners, Insulators, and Inhibitors / 509
- 12.7. Propellant Processing and Manufacture / 511
  - Problems / 515
  - References / 518

<b>13</b>	<b>Combustion of Solid Propellants</b>	<b>520</b>
13.1.	Physical and Chemical Processes / 520	
13.2.	Ignition Process / 524	
13.3.	Extinction or Thrust Termination / 526	
13.4.	Combustion Instability / 528	
	Problems / 537	
	References / 537	
<b>14</b>	<b>Solid Rocket Components and Motor Design</b>	<b>540</b>
14.1.	Motor Case / 540	
14.2.	Nozzle / 550	
14.3.	Igniter Hardware / 563	
14.4.	Rocket Motor Design Approach / 568	
	Problems / 575	
	References / 577	
<b>15</b>	<b>Hybrid Propellant Rockets</b>	<b>579</b>
15.1.	Applications and Propellants / 580	
15.2.	Performance Analysis and Grain Configuration / 585	
15.3.	Design Example / 593	
15.4.	Combustion Instability / 599	
	Symbols / 604	
	References / 606	
<b>16</b>	<b>Thrust Vector Control</b>	<b>608</b>
16.1.	TVC Mechanisms with a Single Nozzle / 609	
16.2.	TVC with Multiple Thrust Chambers or Nozzles / 620	
16.3.	Testing / 621	
16.4.	Integration with Vehicle / 621	
	References / 623	
<b>17</b>	<b>Selection of Rocket Propulsion Systems</b>	<b>624</b>
17.1.	Selection Process / 625	
17.2.	Criteria for Selection / 630	
17.3.	Interfaces / 634	
	References / 638	

<b>18</b>	<b>Rocket Exhaust Plumes</b>	<b>639</b>
18.1.	Plume Appearance and Flow Behavior /	641
18.2.	Plume Effects /	652
18.3.	Analysis and Mathematical Simulation /	657
	Problems /	658
	References /	658
<b>19</b>	<b>Electric Propulsion</b>	<b>660</b>
19.1.	Ideal Flight Performance /	666
19.2.	Electrothermal Thrusters /	670
19.3.	Non-Thermal Electric Thrusters /	677
19.4.	Optimum Flight Performance /	696
19.5.	Mission Applications /	700
19.6.	Electric Space-Power Supplies and Power-Conditioning Systems /	701
	Problems /	706
	Symbols /	707
	References /	709
<b>20</b>	<b>Rocket Testing</b>	<b>711</b>
20.1.	Types of Tests /	711
20.2.	Test Facilities and Safeguards /	713
20.3.	Instrumentation and Data Management /	720
20.4.	Flight Testing /	724
20.5.	Postaccident Procedures /	725
	References /	726
<b>Appendix 1</b>	<b>Conversion Factors and Constants</b>	<b>727</b>
<b>Appendix 2</b>	<b>Properties of the Earth's Standard Atmosphere</b>	<b>730</b>
<b>Appendix 3</b>	<b>Summary of Key Equations for Ideal Chemical Rockets</b>	<b>731</b>
<b>Appendix 4</b>	<b>Derivation of Hybrid Fuel Regression Rate Equation in Chapter 15</b>	<b>733</b>
<b>Appendix 5</b>	<b>Alternative Interpretations of Boundary Layer Blowing Coefficient in Chapter 15</b>	<b>737</b>
<b>Index</b>		<b>739</b>
